A FULL SERVICE MEP FIRM

SSG MEP specializes in best-in-class electrical engineering and lighting design. Working with our design partners, we provide complete mechanical, plumbing, and fire protection engineering design, as well as IT, audio visual, and security system design. SSG also assists project teams with feasibility studies, sustainable design options, and commissioning support.

At SSG, we focus on solving our client's toughest challenges by bringing high-quality design and implementation to every project. Our consultative approach is supported by a commitment to consistent and continuous client communication from award through final punch list.

A WIDE RANGE OF PROJECT EXPERTISE

We work on a wide variety of project types including new buildings, renovations, and historic facilities. SSG MEP excels at technically complex projects by involving our highly experienced engineers in all levels of design, enabling us to guide clients around potential problems.

AUTHENTIC CLIENT CARE

Our engineers and BIM/CAD designers are committed to the highest level of personal service and technical expertise. To ensure that design execution accurately reflects the project vision, we conduct regular, detailed project reviews. As our client, you can trust that your best interests are served.

LATEST INDUSTRY SOFTWARE

We invest in the best software, technology, and training available so that SSG can work with world-class partners and clients. Then we apply a very hands-on approach to team and client interaction. We know that communication and synergy solve problems and develop forward-thinking solutions, always giving our clients the best engineering for the best value. We work in the following programs:

- REVIT
- AutoCAD
- MicroStation
- Bluebeam
- MasterSpec
- AGI
- ETAP

SUSTAINABLE SOLUTIONS

Effective sustainable engineering addresses the core elements of energy consumption conservation, operational efficiency, and system maintainability. Our LEED® Accredited Professionals focus on minimizing energy demand, reducing maintenance costs, and optimizing ease of use for owners.
